The Great Wall Collection is one of the latest Art Opuses of Miha Murn's creative work. With the presented artworks the artist shows his vision of the liminal phase in the artistic spheres. Traditional opera characters step out from their typical frameworks and certain dramatic roles and find themselves at the transition between the established opera world and modernity. With depictions of the transitions of the characters, the author reminds us of the constant reproduction of art and tries to capture the elements of both worlds that artworks depict. On a background which suggests the current, modern world, he tries to at least partially, through various techniques of applying colors and other elements, capture the basic characteristics of traditional Chinese opera. Throughout the whole collection, the author strives to create an atmosphere of potential story development.
